

## Speaker Profile

### Andrew Cuthbert – Halliburton, Boots & Coots

A graduate of the University of London, Andy has 34 years of industry experience, has been involved in projects of ever-increasing complexity with the introduction and coordination of new technology and engineering innovations, such as multilateral completion technology, rotary steerable systems, subsea capping stack technology and plume force analysis.

Andy holds nine patents with 18 still pending, has authored or co-authored 30 technical papers for the SPE, IADC, ASME, OTC and the PMI on Directional Drilling, Multilateral Technology, well control measures and aspects of project management, presenting to the global O&G community.

He now leads a team of well control engineers in Houston as the Global Engineering and Technology Manager for Boots & Coots.
